

Job Title	Range	Duties	Level A (Developing)	Level B (Practising)	Level C (Accomplished)
Principal Business Intelligence Analyst	Range 6	<p>The Principal Business Intelligence Analyst supports services and directorates across the council by delivering robust data analysis, statistical modelling, and machine learning to create actionable insights. This role involves collecting, processing, analysing, and presenting data from different sources and formats to support strategic decision-making, understand residents, customers, and business processes, and drive organisational improvement. The role will lead analytical projects, manage and guide a team of analysts or cross-functional project teams, and ensure that the outputs are impactful, high quality, and meet ethical and governance requirements.</p> <p>The role will advocate for the use of data, guiding services in effective data creation and usage. This includes performing advanced quantitative and qualitative analysis, participating in data science projects, and championing user research to support the delivery of council services and drive change. The role also involves demonstrating in-depth knowledge of data science tools and techniques, enabling effective problem-solving, and ensuring data quality and integrity to create accurate and reliable insights that achieve the council's operational and strategic priorities.</p>	Required for this level	In addition to level A	In addition to levels A and B
			<b>Qualifications</b> A recognised qualification in a relevant subject at least at a level 4.	<b>Qualifications</b> Evidence of working towards a qualification, in a relevant subject such as data science, statistics etc, equivalent to at least a degree.	<b>Qualifications</b> A degree in a relevant subject such as data science, statistics etc
